Fund manager commentary

30 September 2021

A difficult September caused most major stockmarkets to either fall flat or dip into negative territory, as a variety of fears weighed on investors' minds as the summer drew to a close. In China, power supply shortages and doubts over the health of the property sector upset investor appetite in the region, contributing to underperformance from emerging market shares and bonds more broadly. In the US, UK and Europe, fears over persistently high inflation and various discussions about the potentially imminent withdrawal of central bank support measures also contributed to volatile financial markets in September, leading to low returns from many shares and a rapid rise in government bond yields.

Inflation remained elevated in the US, UK and some emerging market economies. While many governments withdrew economic stimulus measures during the quarter, most monetary easing policies from the world's major central banks were left in place, boosting economic conditions for businesses and consumers.

UK commercial property returns continued to improve in the third quarter of 2021, with total returns from all sectors providing a positive contribution. The UK economic outlook also continued to improve. Trends of the past few months remain in play, with ongoing strong demand for industrials. Out of town retail is also recovering and a strong pick-up was seen in retail warehouse transaction activity.

The M&G Treasury & Investment Office (T&IO) outlook is cautiously optimistic although much uncertainty remains in 2021.

The figures are intended only to demonstrate performance history of the fund over the period shown. They include a representative fund charge of 0.65% pa and any additional investment expenses. They take no account of product or advice charges.

The application of charges will impact the overall performance. Please also note that our charges may vary in the future and may be higher than they are now. Fund Performance is based upon the movement of the daily price and is shown as total return in the fund's currency of denomination with gross income reinvested. Because of changes in exchange rates the value of your investment, as well as the money you take from it, can go down as well as up, so you might get back less than you put in. Performance is shown on a bid to bid price basis.

These funds are available through our Prudential International Investment Bond and International Prudence Bond. Investments in the PruFund Range of Funds are backed by assets in the Long-Term Fund of The Prudential Assurance Company Ltd, through a reinsurance agreement.

These funds aim to protect investors against some of the ups and downs of investment performance using "smoothing" mechanisms. Please refer to "Your guide to investing in the PruFund Range of Funds" for more information.

Where the PruFund Protected Growth (Sterling) Fund is available, it includes a guarantee. This means that on the Guarantee Date your fund will have a value equal to at least the value of the fund holding at the start of the guarantee period, after a proportional reduction for any regular or one-off withdrawals. Where the fund's available, there's a charge for the guarantee; please see "The PruFund Range of Funds: Guarantee options" for more information.

For any fund, there may be a delay in buying, selling or switching of units. These delays will only apply in exceptional circumstances and if this applies to you, we will let you know. For more information, please refer to your Contract Conditions, which you can get from your Financial Adviser.
